UNIVERSITY OF ILLINOIS PRESS
Behind the Gas Mask
The U.S. Chemical Warfare Service in War and Peace
THOMAS I. FAITH

“Faith offers a compelling investigation of the U.S. Army’s experience with chemical weapons in World War I. Ultimately the public and government rejected future use of chemical weapons in battle. If Americans had accepted the arguments of chemical weapons experts, twentieth-century warfare would have been even more terrifying. This book tells an important story of a path not taken, at least not yet.”—Jennifer D. Keene, author of Doughboys, the Great War and the Remaking of America

Gender and Sexuality in Women’s Sport | Second Edition
SUSAN K. CAHN

Nursing Civil Rights
Gender and Race in the Army Nurse Corps
CHARISSA J. THREAT

Investigates the parallel battles against occupational segregation by African American women and white men in the U.S. Army.

As Threat reveals, both groups viewed their circumstances with the Army Nurse Corps as a civil rights matter. Each conducted separate integration campaigns to end the discrimination they suffered. Yet their stories defy the narrative that civil rights struggles inevitably arced toward social justice with the ironic result that simultaneously confronted and reaffirmed the social hierarchies that nurtured discrimination.

When Tenants Claimed the City
The Struggle for Citizenship in New York City Housing
ROBERTA GOLD

"Is the purchase of a single-family house in the suburbs really the only route to housing happiness? With vigorous, readable prose Roberta Gold uncovers the history of an alternative vision. In New York City, leftist men and women agitated for the rights of renters to build interracial, affordable, locally-controlled communities of apartment dwellers. As Americans contemplate the lessons of the last decade's foreclosure crisis, they would do well to consider the possibilities illuminated in When Tenants Claimed the City."—Amanda Seligman, author of Block by Block: Neighborhoods and Public Policy on Chicago's West Side

"A well-researched and written study. . . . Highly recommended."

Sensing Chicago
Noisemakers, Strikebreakers, and Muckrakers
ADAM MACK

“Changes our understanding of the history and particularly the experience of life in the industrial city.”
—James R. Barrett, author of The Irish Way: Becoming American in the Multiethnic City

A hundred years and more ago, a walk down a Chicago street invited an assault on the senses. Untiring hawkers shouted from every corner. The manure from thousands of horses lay on streets. Odors from a fouled river mingled with the all-pervading stench of the stockyard slaughterhouses. In Sensing Chicago, Adam Mack lets fresh air into the sensory history of Chicago in the nineteenth and early twentieth centuries by examining five case studies: the Chicago River, the Great Fire, the 1894 Pullman Strike, Upton Sinclair’s The Jungle, and the White City amusement park.

City of Noise
Sound and Nineteenth-Century Paris
AIMÉE BOUTIN

Aimée Boutin tours the sonic space that orchestrated the different, often conflicting sound cultures that defined the street ambience of Paris. Mining accounts that range from guidebooks to verse, Boutin braids literary, cultural, and social history to reconstruct a lost auditory environment. Throughout, impressions of street noise shape writers’ sense of place and perception of modern social relations. As Boutin shows, the din of the Cris contrasted economic abundance with the disparities of the capital, old and new traditions, and the vibrancy of street commerce with an increasing bourgeois demand for quiet. In time, peddlers who provided the soundtrack for Paris’s narrow streets yielded to modernity, with its taciturn shopkeepers and wide-open boulevards, and the fading songs of the Cris became a dirge for the passing of old ways.
