Geopolitics of Information

Media, Geopolitics, and Power
A View from the Global South
HERMAN WASSERMAN
“Wasserman’s book would surely be deemed as one of the most powerful articulations from the Global South, urging media professionals and scholars to rethink and recontextualize global journalism in this post-West, post-order, post-truth world.”—Arbin Shi, Tsinghua University

The Media Commons
Globalization and Environmental Discourses
PATRICK D. MURPHY
“Murphy skillfully unpacks the links among the institutions, ideology, and messages of global media systems and our imaginaries of the environment. The result is a scathing critique of the absorptive capacity of a market-driven, ‘Promethean’ discourse that eludes social agency in response to our global ecological tensions.”—Robert Cox, coeditor of The Routledge Handbook of Environmental Communication

Digital Depression
Information Technology and Economic Crisis
DAN SCHILLER
“Schiller has outdone himself this time … Schiller puts on an amazing performance juggling his well-placed emphasis on the role of the U.S. policy system, with the need to take note of changes taking place within the European community, and the rapidly rising power and influence being exercised on a global scale by government and corporate actors in China and India.”—Journalism & Mass Communication Quarterly

Media in New Turkey
The Origins of an Authoritarian Neoliberal State
